Georgian Countries

There are names of some countries in South America, written in the Georgian language, together with their translations to English:

<table>
<thead>
<tr>
<th>ქართული</th>
<th>English</th>
</tr>
</thead>
<tbody>
<tr>
<td>ბრაზილი</td>
<td>Brazil</td>
</tr>
<tr>
<td>პერუ</td>
<td>Peru</td>
</tr>
<tr>
<td>ურუგვაი</td>
<td>Uruguay</td>
</tr>
</tbody>
</table>

What are the names, in English, of the two untranslated countries?
Ancient Greek

Consider these phrases in Ancient Greek (in a Roman-based transcription) and their unordered English translations:

(A)  ὁ τῶν ἡγίων δύλος  ___ (1) the donkey of the master
(B)  ὁι τῶν δύλων κυρίων  ___ (2) the brothers of the merchant
(C)  ὁι τῶν ἑμπορῶν αδελφοί  ___ (3) the merchants of the donkeys
(D)  ὁι τῶν ονόν ἑμπορῶν  ___ (4) the sons of the masters
(E)  ὁ του κυρίου οἶκος  ___ (5) the slave of the sons
(F)  ὁ τού οἰκείου κυρίου  ___ (6) the masters of the slaves
(G)  ὁ τῶν ἀδελφῶν οἴκος  ___ (7) the house of the brothers
(H)  ὁι τῶν κυρίων ἡγίων  ___ (8) the master of the house

1. Match the Ancient Greek phrase (A-H) with the corresponding English translation (1-8).

2. Translate into Ancient Greek:
   a) the houses of the merchants

      ________________________________

   b) the donkeys of the slave.

      ________________________________

Note: the letter ὅ stands for a long ο.
Aragonese

In the Iberian Peninsule, there are several languages, apart from Portuguese and Spanish (Castillan), that share the same romanic origin, such as Catalan, Galician, Mirandese, Asturian, Leonese and Aragonese. The list below brings a list of words in Aragonese, their plural forms and their translations to Portuguese. Seguem algumas palavras em aragonés com suas traduções para o português e suas formas no plural:

<table>
<thead>
<tr>
<th>English</th>
<th>Aragonese Single</th>
<th>Aragonese Plural</th>

</tbody>
</table>

Write down the missing words.
**Japanese Braille**

*Braille* is a tactile writing system, based on a series of raised dots, that is widely used by the blind. It was invented in 1821 by Louis Braille to write French, but has since been adapted to many other languages. English, which uses the Roman alphabet just as French does, required very little adaptation, but languages that do not use the Roman alphabet, such as Japanese, Korean, or Chinese, are often organized in a very different manner!

To the right is a Japanese word written in the *tenji* ("dot characters") writing system. The large dots represent the raised bumps; the tiny dots represent empty positions.

karaoke  ● ● ● ● ● ● ● ●

1. The following *tenji* words represent *atari*, *haiku*, *katana*, *kimono*, *koi*, and *sake*. Which is which? You don’t need to know either Japanese or Braille to figure it out; you’ll find that the system is highly logical.

   a. ________ ○ ○ ● ● 
   b. ________ ○ ○ ● ● ●

   c. ________ ▪ ▪ ▪ ▪ 
   d. ________ ◊ ◊ ◊ ◊

   e. ________ ● ● ● ● 
   f. ________ ● ● ● ●

2. What are the following words?

   g. ________ ○ ○ ● ● 
   h. ________ ○ ○ ● ● ●

3. Write the following words in *tenji* characters:

   i. samurai ________
   j. miso ________
Lalana Chinantec

Lalana Chinantec is a language spoken by approximately 10,000 people who live in the Oaxaca region of Mexico. In the following orthography a colon (:) marks a long vowel, and the ? symbol marks a glottal stop (like the sound in the middle of uh-oh).

- kalakwa: kwi: li:? The beautiful corn grew.
- milad?o mo:h kya My pineapples have turned out well.
- li:? kalane kwi: kwa: kya My tall corn yellowed beautifully.
- d?o kalaro:h mo:h ne kya My yellow pineapples ripened well.
- kalad?o kwi: The corn turned out well.
- milakwa: kwi: The corn has grown.

1. What does the word li:? mean? ____________________________
2. What does the word ro:h mean? ____________________________
3. Translate the following sentences into Lalana Chinantec:
   a) The good pineapples became beautiful.
      ____________________________
   b) My ripe corn has yellowed well.
      ____________________________
4. Translate the following sentences into English:
   c) milaro:h kwi: ne ____________________________
   d) li:? kalakwa: kwi: ____________________________
Imagine that you have heard these sentences: Jane is molistic and slatty.

Jennifer is cluvious and brastic.

Molly and Kyle are slatty but danty.

The teacher is danty and cloovy.

Mary is blitty but cloovy.

Jeremiah is not only sloshful but also weasy.

Even though frumsy, Jim is sloshful.

Strungy and struffy, Diane was a pleasure to watch.

Easy though weasy, John is strungy.

Carla is blitty but struffy.

The salespeople were cluvious and not slatty.

1. Then which of the following would you be likely to hear?

   _____ a. Meredith is blitty and brastic.
   _____ b. The singer was not only molistic but also cluvious.
   _____ c. May found a dog that was danty but sloshful.

2. What quality or qualities would you be looking for in a person?

   _____ a. blitty
   _____ b. weasy
   _____ c. sloshful
   _____ d. frumsy
Several Persian phrases are presented together with their translations:

- gorbe zir-e raxtexāb  the cat under the bed
- xåne pāin-e kuh  the house under the mountain
- čahārpāye zir-e miz  the stool under the table
- ġayeğ zir-e pol  the boat under the bridge
- amānat pāin-e dar  the package under the door
- šahr zir-e āftāb  the city under the sun
- nāme zir-e ketāb  the letter under the book
- ketāb pāin-e komod  the book on the lowest shelf in the bookcase

1. Translate into English:
   a) čahārpāye pāin-e miz  __________________________________
   b) ketāb zir-e komod  __________________________________

2. Here are two English phrases and their Persian translations (with gaps):
   c) the stone under the water  sang _____ āb
   d) the box under the tree  ja'abe _____ deraxt

Fill the gaps. If you think that some of them can be filled in more than one way, give all possible answers. Explain your solution.

Note: ā, å, š, č, ġ, ' represent specific Persian sounds.

Problem by Yulia Mazurova for the Moscow Traditional Olympiad of Linguistics 2001/2002
Several phrases have been translated into Kazakh (written in Roman script here), but the translations are given in random order. Some of the words are missing.

a. one and five
   __i. ____ ben elüw

b. one and eight
   __ii. bir men bes

c. three and two
   __iii. bir ____ segiz

d. four and seven
   __iv. elüw eki men on

e. seven and fifty
   __v. ____ men elüw

f. eight and fifty
   __vi. otız ben ____

g. thirteen and thirty
   __vii. tört pen źeti

h. thirty and two
   __viii. üş ____ eki

i. fifty-two and ten
   __ix. on üş pen otız

1. Match each phrase with its correct translation and supply the missing words.

2. Translate into Kazakh:

   a. five and thirty-eight
      ________________________________

   b. ten and four
      ________________________________

   c. seven and fifty-three
      ________________________________

   d. thirty-eight and five
      ________________________________

Note: i, ō, ū, ṭ are specific Kazakh vowels. The letter ź has the sound of s in the word usual.

Kazakh language belongs to the Central Turkic groups of languages. It is the official language and principle native language of the Republic of Kazakhstan. It is spoken by about 6,5 million people in Kazakhstan and about 1,5 million people southern Siberia, northwestern China and northwestern Mongolia.

Problem by Pyotr Zubkov
for the Moscow Traditional Olympiad of Linguistics 2002/2003
Taikyoku Shōgi

Japanese Chess (Shōgi), played on a board of size 9 by 9 and with a total of 40 men, is the most popular intellectual game in contemporary Japan, where it entertains between 10 and 20 million people. But between the 8th and 18th century many other variants of the game were invented in that country, some on smaller and some on larger boards.

The largest of all Japanese chess games (and generally the largest chess game in history) is Taikyoku Shōgi (more or less “Ultimate Chess”), in which the board is of size 36 by 36 (or 1296 squares in all) and every player has in the beginning an army of 402 men of 208 different types.

This is a table which contains the names of some of the men in Taikyoku Shōgi (in Japanese and in English translation), as well as the name of the man to which each of them promotes upon reaching one of the farthest 11 ranks of the board.

<table>
<thead>
<tr>

Problem by Victória Flório for the Brazilian Linguistics Olympiad 2013
Inuktitut Numbers

Inuktitut is one of the main languages of the Inuit people, which lives in several areas in the northern Canada and Alaska. Few years ago, students from a school in the small town of Kaktovik invented a new way of writing numbers, more appropriate for the way numbers are expressed in the Inuktitut language.

Imagine that you are travelling through northern Canada and find some Inuit students that know nothing about English, Latin script or Indo-Arabic numerals. Then, in order to start communication, one of the students offer you a list of mathematical operations, shown below (in the left column). This version of the table uses the Indo-Arabic symbols for the operations.

\[\begin{array}{ll}
\hat{\text{\textbackslash}} + \text{\textbackslash} = \text{\textbackslash}\text{\textbackslash} & \text{\textbackslash}\text{\textbackslash} + \text{\textbackslash} = \\
\text{\textbackslash}\text{\textbackslash} + \text{\textbackslash} = \hat{\hat{\text{\textbackslash}}} & \hat{\text{\textbackslash}} \times \hat{\hat{\hat{\text{\textbackslash}}}} = \\
\hat{\text{\textbackslash}} + \hat{\text{\textbackslash}} = \hat{\hat{\hat{\text{\textbackslash}}}} & \hat{\text{\textbackslash}} - \text{\textbackslash} = \\
\text{\textbackslash}\text{\textbackslash} - \text{\textbackslash} = \hat{\hat{\hat{\text{\textbackslash}}}} & \hat{\hat{\hat{\text{\textbackslash}}}} \times \hat{\text{\textbackslash}} = \\
\text{\textbackslash}\text{\textbackslash} \times \hat{\text{\textbackslash}} = \hat{\hat{\hat{\text{\textbackslash}}}} & \hat{\text{\textbackslash}} - \hat{\text{\textbackslash}} = \\
\hat{\hat{\text{\textbackslash}}} \times \hat{\text{\textbackslash}} = \text{\textbackslash}\text{\textbackslash}\text{\textbackslash} & \hat{\hat{\text{\textbackslash}}} + \hat{\text{\textbackslash}} = \\
\hat{\text{\textbackslash}} + \hat{\hat{\text{\textbackslash}}} = \hat{\hat{\text{\textbackslash}}} & \hat{\text{\textbackslash}} \div \text{\textbackslash} = \\
\end{array}\]

1. Seeing that you understood the table, the student challenges you to write down the answers of another series of operations, shown in the right column. Give the answers in Inuktitut numerals.

2. To assure the student that you understood the system, you decided to write down the date of today (day, month and year) in Inuktitut numerals, assuming they used Gregorian calendar. What did you write down?

Problem by Bruno L’Astorina and Felipe Gonçalves Assis
for the Brazilian Linguistics Olympiad 2011
Basque Numbers

Several multiplications have been written out in Basque. There are gaps in the last two lines.

\[
\begin{align*}
\text{bi} \times \text{bi} &= \text{lau} \\
\text{bi} \times \text{bost} &= \text{hamar} \\
\text{bi} \times \text{hamar} &= \text{hoge} \\
\text{hiru} \times \text{bost} &= \text{hamabost} \\
\text{hiru} \times \text{hamar} &= \text{hogeita hamar} \\
\text{bost} \times \text{bost} &= \text{hogeita bost} \\
\text{bost} \times \text{zazpi} &= \text{hogeita hama} \\
\text{bost} \times \text{zazpi} \times \text{bederatzi} &= \text{hirurogeita hiru} \\
\text{zazpi} \times \text{hamar} &= \text{hirurogeita hamar} \\
\text{lau} \times \text{bost} &= \text{__________} \\
\text{__________} \times \text{hamar} &= \text{laurogeita hamar}
\end{align*}
\]

1. Fill in the gaps.

2. Write in figures:
   a) laurogeita hamahiru = ______
   b) hirurogei = ______

3. Write out in Basque:
   c) 39 = ____________________
   d) 77 = ____________________
   e) 80 = ____________________

Note: The letter \( s \) has the sound of English \( sh \), \( z \) of \( s \), \( tz \) of \( ts \) in cats. The letter \( b \) is mute.

! Basque is spoken by 500,000 to 600,000 people in France and Spain and by about 170,000 people in South America. It has not been proven to be related to any other language.

Problem by Anna Pazelskaya
for the Moscow Traditional Olympiad of Linguistics 2001/2002
Basque Kinship

This is the genealogical tree of a Basque family. The blanks spaces in the diagram stand for the names Ines, Kontzi, Felix, and Andres (listed here in no particular order).

Some of the relationships between the members of this family are described below in Basque:

Ines Mikelen emaztea da. Andries Iboneren neba da.
Iker Joseparen senarra da. Manu Iboneren semea da.
Mikel Felixen anaia da.

1. Identify the names that belong in the blank spaces in the diagram.
2. Is Kontzi male or female? Explain, using the data from the problem.
3. Fill in the gaps in the following Basque sentences (referring to the same family):
   a) Kontxi ______________________ ahizpa da.
   b) Inma eta Manu Iboneren ______________________.
   c) Ibone Andresen ______________________.
   d) Manu Inmaren ______________________.
   e) Kontxi Mikelen ______________________.
   f) Emilio ______________________ senarra da.

Note: Ibone, Ines, Inma, Josepa, Miren, and Monika are women’s names; Andries, Emilio, Felix, Iker, Manu, Mikel are men’s names. The letters s and x stand for sounds similar to English sh; z has the sound of English s, tx of English ch, j is a sound intermediate between g and y; h is mute.

Problem by Anna Pazelskaya
for the Moscow Traditional Olympiad of Linguistics 2002/2003
**Icelandic Kinship**

Guðrún Eriksdóttir Hrafnhildardóttir and Jakob Christiansson had three kids, from which they are very proud, for their successes and for all of them have given them grandsons or granddaughters. In order to celebrate their 70th wedding anniversary, the long-lived couple had a party with all their descendants: sons and daughters, grandsons and granddaughters, great-grandsons and great-granddaughters. Naturally, some of their sons-in-law and daguthers-in-law, as well as grandsons-in-law and granddaughters-in-law, were also invited. Here is the list of all the people in the party:

<table>
<thead>
<tr>
<th>Christian Kristínsson</th>
<th>Margret Steinunnardóttir Jakobsdóttir</th>
</tr>
</thead>
<tbody>
<tr>
<td>Daniel Guðrúnarson Jakobsson</td>
<td>Ragnheiður Jakobsdóttir</td>
</tr>
<tr>
<td>Daniel Steinunnarson Dorarinssonar</td>
<td>Rakel Ragnheiðardóttir Bergmann</td>
</tr>
<tr>
<td>Eva Emilsdóttir Kvaran</td>
<td>Robert Bergmann Gunnarsson</td>
</tr>
<tr>
<td>Gunnar Gunnarsson</td>
<td>Sara Jakobs Dorarinssonar</td>
</tr>
<tr>
<td>Hrafn Kristínsson Viktorsson</td>
<td>Sigurður Jóns Bergmann</td>
</tr>
<tr>
<td>Ingimundur Sigurðarson Bergmann</td>
<td>Stefan Gunnarsson Gunnarssonar</td>
</tr>
<tr>
<td>Jakob Dorarinsson</td>
<td>Steinunn Jakobsdóttir</td>
</tr>
<tr>
<td>Jón Oddsson Bergmann</td>
<td>Viktor Danielsson Jakobsson</td>
</tr>
<tr>
<td>Kristín Guðrúnardóttir Aronsdóttir</td>
<td>Viktoria Viktorskóttir</td>
</tr>
</tbody>
</table>

1. Among the participants, who is the older descendant of an immigrant?

2. Which of the sons/daughters of Guðrún and Jakob has no grandsons/granddaughters?

3. How many kids had Viktor? _______

4. How many kids had Steinum? _______

5. Which of the sons/daughters of Rakel didn’t inherit any of her surnames?

6. Write five possibilities of name and surname for the son that Eva and Christian are waiting, knowing that his first name will be the same as the father of the pop singer Björk Guðmundsdóttir.

7. Steinunn liked very much his grandmother (mother of her mother), so that she gave her name to the daughter she had with Björn Annasson, before she married with her present husband. Give two possibilities for the name of this girl.

---

Note: j is pronounced as y in you; Đ and ð are pronounced as th in this.

Problem by Robson Carapeto
for the Brazilian Linguistics Olympiad 2013
Manam

Manam Pile ("Manam Talk") is a Malayo-Polynesian language spoken on Manam Island off the coast of Papua New Guinea. Manam is one of the most active volcanoes in the world, and during violent eruptions the population must be evacuated to the mainland.

Below, a Manam islander describes the relative locations of the houses above.

1. Onkau pera kana auta ieno, Kulu pera kana ilau ieno.
2. Mombwa pera kana ata ieno, Kulu pera kana awa ieno.
3. Tola pera kana auta ieno, Sala pera kana ilau ieno.
4. Sulung pera kana awa ieno, Tola pera kana ata ieno.
5. Sala pera kana awa ieno, Mombwa pera kana ata ieno.
6. Pita pera kana ilau ieno, Sulung pera kana auta ieno.
7. Sala pera kana awa ilau ieno, Onkau pera kana ata auta ieno.
8. Butokang pera kana awa auta ieno, Pita pera kana ata ilau ieno.

1. Onkau’s, Mombwa’s, and Kulu’s houses have already been located on the map above. Who lives in the other five houses?

A:  
B:  
C:  
D:  
E:  

2. Arongo is building his new house in the location marked with an X. In three Manam Pile sentences like the ones above, describe the location of Arongo’s house in relation to the three closest houses.

Problem by Patrick Littell
for the North American Computational Linguistics Olympiad 2008
Guaraní Verbs

The following Guaraní verb forms are listed along with their English translations.

- **japyhyta**  
  We will be catching
- **noñe'ēi**  
  He is not talking
- **nohyvykõiri**  
  He is not enjoying
- **okororō**  
  He is crying
- **ombokapu**  
  He is shooting
- **ndajajupirima**  
  We were not waking up
- **pemomaitei**  
  You are greeting
- **ahyvykõima**  
  I was enjoying
- **ndokarumo'ai**  
  He will not be eating
- **añe'êta**  
  I will be talking
- **ndapevo'oima**  
  You were not taking
- **namomaiteiri**  
  I am not greeting
- **napekororōmo'ai**  
  You will not be crying
- **japurahei**  
  We are singing

1. Translate into English.
   a) **akaruma**  
   b) **ojupita**  
   c) **ndavo'omo'ai**  
   d) **napekorōi**  
   e) **ndapyhyima**

2. Translate into Guaraní.
   f) You are not shooting
   g) He is not singing
   h) We will be eating
   i) I will not be singing

Notes: “you” is always plural in the sentences above. A squiggle over a vowel indicates that it is nasal (pronounced partly through the nose). The letter ſ is pronounced like the sound in the middle of “piñata” or “onion”. The letter y is pronounced like the “u” in “cut”. The letter j and the apostrophe (’) are specific consonants. Guaraní is one of the official languages (along with Spanish) of Paraguay, where it is spoken by 94% of the population.

Problem by Bozhidar Bozhanov

for the North American Computational Linguistics Olympiad 2009
Aymara

Aymara is a South American language spoken by more than 2 million people in the area around Lake Titicaca, which, at 12,507 feet above sea level, is the highest navigable lake in the world. Among the speakers of Aymara are the Uros, a fishing people who live on artificial islands, woven from reeds, that float on the surface of Lake Titicaca.

1. Below, seven fishermen describe their catch. Who caught what?

   ![Fish Images]

   ___ 1. “Mä hach’a challwawa challwataxa.”
   ___ 2. “Kimsa hach’a challwawa challwataxa.”
   ___ 3. “Mä challwa mä hach’a challwampiwa challwataxa.”
   ___ 4. “Mä hach’a challwa kimsa challwallampiwa challwataxa.”
   ___ 5. “Paya challwallawa challwataxa.”
   ___ 6. “Mä challwalla paya challwampiwa challwataxa.”
   ___ 7. “Kimsa challwa paya challwallampiwa challwataxa.”

Also, watch out! One of the fishermen is lying.

2. Your daily catch is pictured below. Describe it in Aymara, and don’t lie!

![Fish Image]

Note: ã is a long a; ì is pronounced as ìy; x as the ch in Scottish loch. Some vowels transcribed here are deleted in actual speech.

Problem by Patrick Littell
for the North American Computational Linguistics Olympiad 2008
Toki Pona

Toki Pona is a constructed language, created in 2011 by the Canadian linguist Sonja Elen Kisa. Her aim was the language to be a minimal language, undervaluing the empty and abstract communication such as the ones of politicians and bureaucrats and pointing more directly to the concrete human life experiences. Therefore, the language makes use of only 123 words, with roots coming from different language families.

What follows is a list of some words and expressions in Toki Pona and, out of order, their English translations:

- kiwen suno jelo, tomo tawa telo, jan Powi, ilo suno, telo jelo, jan ilo, jan toki, supa lape, supa moku, ma tomo, wile moku, tawa, nasin linja, wile pona, telo kiwen, lipu toki, wile lawa, linja lawa, tomo moku, linja kiwen

  prophet, well-intentioned, hair, lantern, ice, robot, boat, thorn, hungry, Boris, book, piss, city, bed, orthodoxy, movement, restaurant, dominant, dinner table, gold

1. Do the right associations between the words and translations.

2. Give the translation of all the simple Toki Pona words used in the compounded words and expressions of this problem.

3. How would you translate literally the name of the language?
